SUMMARY

Software Development With A2 and advanced certificate from kLab . Field -focused professional with experience in client engagement, data management, and project delivery

I specialize in building reliable backend systems and high-performance mobile apps using React Native, NestJS, and Python. I have hands-on experience designing secure databases (PostgreSQL, MongoDB, Redis), APIs integration, and adding real-time features. From my recent work building digital systems for SmartCoopHub, I am skilled at fixing complex system bugs, writing clear technical docs, and delivering clean code on time. I am a problem-solver who loves collaborating with teams to turn business needs into secure, working software, and am Advanced in active listening.

EDUCATIONAL BACKGROUND

KIGARAMA TSS– KIBUNGO, NGOMA, Rwanda

January 2023 – July 2025

A2(A2 Diploma) Software Development

Relevant Coursework: Programming (Nodejs, JavaScript, python, flutter, Nestjs, Fastifyjs), Machine learning, Mathematical foundations for computing, Database management, Data structures & algorithms, Web development, Mobile platform development with React Native.

PROFESSIONAL WORK EXPERIENCE

Intern - Full Stack Developer and Mobile app

Knowledge Lab (Klab) TechUpskills for All program – Kigali , Rwanda

TechUpSkill is a talent Pre-Incubation program designed to equip individuals with essential technical and digital skills to meet the demands of Rwanda's growing ICT sector.

The program focuses on practical training and hands-on experience, helping participants build competency in fields like software development and data analysis.

PROJECTS

Smart cooperative hub -Dev Leader

October 2025 - November 2025

- Developed an interactive and user-friendly front-end of a fleet management web dashboard using React Js to help local businesses manage their fleet, reduce fuel costs, and make data-driven decisions.
- Engaged with Cooperative Stakeholders in the field to Gather requirements and drive adoption of platform

Kapee-Inspired Mobile Commerce App

- Built animated product sections, cart logic, and profile flows with modular architecture
- Integrated cloud storage (Cloudinary) and secure credential management
- Designed pixel-perfect UI inspired by top-tier mobile commerce platforms

IsukuAI App

- The waste management system developed for helping people how to manage their waste and how to reuse
- Integrated with Gemini APIs , this integration help use to scan waste and AI tell them what to do with that wastes.
- Well design and build with in ReactNative then their backend is Nestjs the best framework

EXTRACURRICULAR ACTIVITIES

Personal Development Projects

Built and maintained practical apps (IsukuAIApp, HiMateApp, KapeeApp , IHAHIRO app(e-commerce App)) to deepen my real-world experience outside class.

Open-Source Contributions (GitHub)

Contributed big fixes and improvements to community projects, improving my collaboration and version-control workflow.

Professional in Active listening and Custom Support

CERTIFICATES AND AWARDS

Full-Stack Developer Certificate -Knowledge Lab (KLab)					November 2025
Mobile	developer	Certificate	-Knowledge	Lab	(Klab)
November	2025				

SKILLS

Programming: (Python, React Native, Nodejs, Typescript, NestJS, RealTime WebSocket)	Software Development (web & mobile)
DBMS: (Postgres, MongoDB, MySQL, Redis)	
Sales & Business: Field Engagement, Negotiation, Active Listening, Customer support	
Computer: typing, Word processing, Data Entry, MS office, Google workspace	
Soft skills: Attention to details, communication, teamwork, problem solving	

LANGUAGES

Kinyarwanda (Native)	English (Fluent)
